

National Aeronautics and Space Admin.

§ 1210.4

National Full-Scale Aerodynamic Complex, consisting of the 40- by 80-foot and the 80- by 120-foot wind tunnels and related support facilities at Ames Research Center. These facilities are operated by NASA for industry, NASA, the Department of Defense, and other Government agency projects.

(d) *All other wind tunnels.* All other NASA wind tunnels will be used primarily for NASA research. However, all of these wind tunnels may be used for industry work when it is in the public interest either in joint programs with NASA or on a fee basis.

(e) *NASA policy.* All the projects to be performed in any of the NASA wind tunnels must be appropriate to the facility.

§ 1210.2 General classes of work.

(a) *Company projects.* Includes work for industry on:

(1) Projects which are neither under contract nor supported by a letter of intent from a Government agency; and

(2) Company desired tests which are related to a project which is either under contract with or supported by a letter of intent from a Government agency, but are beyond the scope of the tests requested by the Government agency.

(3) A fee will be charged for company projects.

(b) *Government projects.* Includes work for industry on projects which are either under contract with or supported by a letter of intent from a Government agency. The work must be requested by the Government agency. No fee will be charged for Government projects.

(c) *United States/foreign industry consortium projects.* This involves U.S. companies, which have formed a consortium or any other type of association with foreign companies, that desire tests on aerospace projects of joint or foreign interest. An application for work for such a consortium shall disclose the foreign interest in or anticipated foreign benefit from tests to be conducted and shall first be reviewed by the Director, International Affairs Division, for consistency with current U.S. foreign policy and for compatibility with section 102 of the National Aeronautics and Space Act of 1958, as

amended, prior to a final decision being reached on the application. A fee will be charged for these consortium projects unless, in these review procedures, it is determined that Government agency cooperative sponsorship warrants a non-fee arrangement.

(d) *Foreign company projects.* Foreign company requests for wind tunnel use that are not related to U.S. Government or U.S. industry interests or programs will generally not be granted and will in no event be granted prior to a review, as required in paragraph (c) of this section, by the Director, International Affairs Division.

§ 1210.3 Priorities and schedules.

(a) *Priorities.* Unitary wind tunnels shall be available primarily to industry for development work. However, allocations of wind tunnel time shall be in accordance with the public interests, with due consideration to the requirements of the military services, civilian needs, and NASA research. Research work shall have priority in all other NASA facilities.

(b) *Schedules.* Schedules showing the allocation of testing time for Government projects and for company projects for unitary wind tunnels and other major wind tunnels will be established by the appropriate center.

§ 1210.4 Company projects.

(a) *Initiation of company projects.* Company projects will be initiated by a letter to the Center Director followed by a conference between company and NASA representatives at the center having responsibility for the facility proposed for the project. The company representatives will be required to explain the technical need for the project and why the NASA facility is required, as well as to define the extent of the test program, model and equipment requirements, and schedule. The center shall maintain a file of all company requests and their disposition. The company will be required to provide a Safety Analysis Report (SAR) describing potential hazards that the company test program, model, and equipment may present to NASA facilities and personnel, and other documentation required by the facility management to
